

DUBAI MARITIME CITY

Marinetek MEA has successfully completed the first phase of the Dubai Maritime City ("DMC") marina in Dubai. The turnkey project covered the design, supply and installation. DMC is a multi-use commercial facility that will be developed as a major land reclamation project intended to serve the downtown market adjacent to the old city and Port Rashid. At full build the marina accommodates app. 1000 wet berths. Marinetek was awarded the contract on 29th of January 2008 and the marina was substantially completed on the 11th of March for the Dubai Boat Show. The period for procurement, manufacturing, transportation and installation was only 42 days! Despite of this extremely tight time schedule Marinetek was able to meet the target on time. After some additional work, the project was handed over to DMC in September. The walkways of the marina comprise Super Yacht and Premier pontoons and the fingers of Super Yacht Designs. All the products have been manufactured by Marinetek Gulf, located in Sharjah. The pontoons are moored by Seaflex and the services supplied by Rolec.

Dubai Maritime City

Carrickfergus Marina

CARRICKFERGUS MARINA COMPLETED

Marinetek UK was awarded the contract in early 2008 to re-design, completely refurbish and extend the Carrickfergus Marina in Northern Ireland, to take the marina from 290 berths to more than 320 berths. During the refurbishment it was essential that Marinetek ensured that the marina remained working. The project also included a new visitors' berthing area with services, new pontoons and an extended fuelling station. The upgraded Carrickfergus Marina now offers the most modern and up to date facilities in the area. The marina comprises of Marinetek Conduct pontoons with steel frames and concrete decking produced in the UK, Marinetek fingers and the 'top of the range' Spinnaker services package from Rolec. We are confident that the upgrade and extensions to this prestigious marina will ensure that Carrickfergus will continue to retain its 5 Gold Anchors awarded by The Yacht Harbour Association UK.

MARINETEK GROUP

Marinetek Group Ltd has reorganized its senior management team. International and domestic business operations have been divided.
